Visitors | Contract Workers | Vehicles | Material

Axis® Gatepass is Certified Microsoft® Windows 7 compatible application.

Microsoft PartnerNetwork™

Axis Gatepass is a software application that records and tracks movements of visitors, vehicles, contract workers and material inward outward etc. The software generates passes for authorised visitors, vehicles and material outward. These passes can be designed with photographs and barcodes. Axis Gatepass uses advanced technologies and devices like face recognition, finger prints, GSM modem, visiting card scanner with OCR, digital pen and HID tags to give an integrated & technologically futuristic solution.

Visitors

Contract Workers

Vehicles

Material IO

## General Features

- Record entry & exit of visitors, contract workers, vehicles & material
- Pop-ups on client PCs for visitor authorisation
- Allow, hold or reject a visitor
- Digital identification: Face recognition, Finger print, Smart card, Bar-code

Visitor's pass

## Visitors

- Capture new visitor data
- Subsequently, use visitor details from the database
- Capture visitor Photograph (or use existing in the database), fingerprints, vehicle photograph etc.
- Generate instant passes for visitors with prior-appointments
- Online Visitor Authorisation by network protocol or GSM-SMS
- Blacklist visitors, all visitors from a company
- Merge duplicate visitor and company data
- Easy sign-out with Bar-code reader

## Users

- Connect your LDAP user list – no need to define or update your users in AGP.
- Pre-define default meeting location
- Change your online status – available, busy
- Forward visit request to another staff member
- Define alternate user to handle visitor request “in your absence”
- Create visitor appointments for quick pass generation at the Main gate

## Contract Workers

- Manage Contractor and Contract worker details
- Allow entry only to authorised contract workers
- Issue time barred ID-cards with Photo and bar-code to contract workers
- Option to interface bio-matrix device and track entry/exit by finger-print device
- Safety instruction certificate
- Maintain attendance and work-hours of contract workers
- HR can Terminate or extend validity of a contract worker
- Generate statutory reports

## Material IO

- Define Items
- Define multiple, sequential authorisations for material outward
- Two types of outwards – returnable and non-returnable
- Print bar-coded (optional) material outward gate-pass
- Track inwards against outwards
- Reports–over-due items, Inward/Outward register

## Chat Module

- Security users can initiate a chat with online staff members and vice-versa

## Email Integration

- Predefined Email alerts for Visitor arrival appointment, welcome and departure etc.
- Send email to visitor and host on appointment creation and cancellation
- Visitor overstaying e-mail to host
- “Thanks for your visit” mail to the visitor

## Multi-gate

- Allocate different Entry, Exit gates
- Enter from any gate exit from any gate
- Allocate specific security users to specific gate
- Synchronize entry and exit

## Multi-site

- Host a central application server
- Remote sites can access the application server to run a local application
- Single Universal database for global MIS
- Remote site application will display local data (local visitors, users)

## SMS-Gateway and GSM Modem

- Predefined SMS Templates for Authorisation, appointment, welcome & departure messages.
- Visitor authorisation by SMS (using GSM Modem)
- Send Appointment creation message
- Send Appointment cancellation message
- Send “Thanks for your visit” message to the visitor

## Tenants

- Allows single security for multiple Tenants
- Can be used in buildings and complexes having multiple organisations
- Can be used in Residential and housing establishments

## Useful Utilities

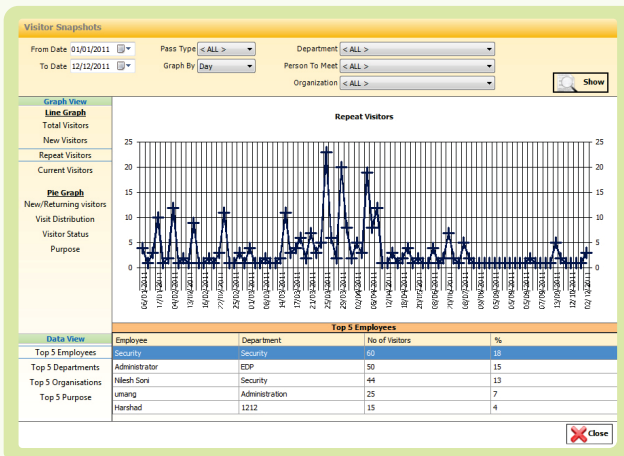

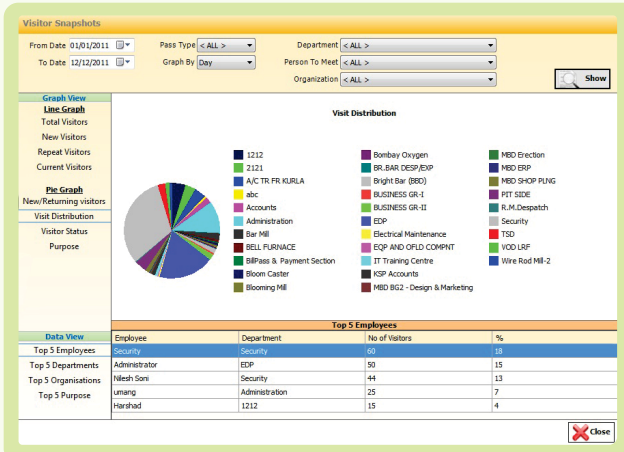

- Merge duplicate companies (e.g. SBI, State bank of India)
- Merge duplicate visitors (e.g. S. B. Singh, Satyadev B Singh)
- Blacklist visitor or visitor company
- SMS sending utility (security to users)
- Inactive users (not shown in active user list)
- Import master data

Visitors | Contract Workers | Vehicles | Material

## Graphical and Statistical snapshots

Axis Gatepass provides extensive graphical snapshots and analytical MIS reports for visitors, contract workers, vehicles and Material IO.

## Device Integration

- Web/Digital Camera
- Barcode scanners
- Smart card readers
- Finger-print scanners
- Visitor Card scanner – with OCR
- GSM modem
- Time and Attendance device
- Digital pen

## Customer Speak

“Axis Gatepass is highly effective in managing visitors at the entry points. It has helped us in facilitating more visitors with the same staff and has many advantages over manual system like getting immediate approval before allowing a visitor inside. Data entry is fast and simple because it automatically picks up information about a visitor from the database on subsequent visits. Outgoing entry is also quick and simple with the use of barcode reader.

The reporting is also helpful and gives us information like total number of visitors at any given point of time, statistics on number of visitors visiting per day/week/month etc.”

Ravinder S Dhul  
 Head - IT Department  
 Bosch Rexroth (India) Limited
